

Transit Oriented Development Study for Clark- Manila Railway System Mayors' Forum

Participants during the Mayors' Forum

In collaboration with ALMEC Corporation, CONCEP recently conducted a forum involving the mayors and planning coordinators of the municipalities and cities traversed by the Bulacan segment of Clark-Manila Railway (CMR) System. The event held is part of the preliminary data gathering activities of the follow-up study for the CMR project which focuses on two objectives: (i) to help decongest Metro Manila and (ii) to facilitate the development of affordable housing to cater households currently living in disaster-prone areas and other danger zones. It was designed to collect insights from the lens of local government officials, being the primary partner in the development of the areas surrounding the train stations. With the active participation of representatives from LGUs of Balagtas, Calumpit, Guiguinto, Malolos, Marilao and Meycauayan, the forum was successful in soliciting valuable information for the follow-up study.
